Ochelata, OK 74051 Phone: 918-535-2302

MISSION STATEMENT

April 13, 1994

Grand Lake Public Works Authority was established as a public trust for the benefit of Delaware County residents and in particular those residents on Monkey Island.

The Authority's long term goal is to assist in improving the environmental quality and safety of its service area by offering quality water and sewer services wherever they can be provided at competitive rates. In this connection the Grand Lake Public Works Authority will:

1. Provide water and sewer to those users connected to the system at the initial organization of the Authority in March, 1992. These services shall be of proper quality and quantity, in compliance with all state and federal regulations, and provided at competitive rates without discrimination in conformance with the Grand Lake Public Authority water and sewer revenue bonds-series 1992-official statement.
2. Aggressively work to extend its water system to potential new users to the extent economically feasible in order to maximize the use of surplus capacity in the best interest of all users. Such extensions shall include an option to supply water at fire flow rates.
3. Offer contract operations and maintenance to other water and sewer systems existing in the area to the extent economically feasible.
4. Evaluate the feasibility of expanding the existing GLPWA sewer plant facility to better serve existing as well as an expanded service area.
