Policy

Responsibility of Single Pump Sewer Lift Stations

Due to increased issues regarding accessibility to single pump sewer lift stations, their control panels, tripped breakers inside of absentee customers' homes and continued disposal of grease, rags and other articles these systems were not designed to handle; GLPWA will no longer be responsible for these stations. This is basically an appliance like a garbage disposal, refrigerator, etc. The only Lift Stations that GLPWA will operate and maintain are ODEQ approved stations with duplex pumps.

Policy is effective as of August 1, 2010 or as soon as GLPWA can get independent company(ies) to provide maintenance service.

Board approved May 21, 2010
